

# AutoMEC®

## Door Operating Mechanism

Miner's fully-automated AutoMEC® rapid discharge system is designed to keep up with the industry's demand for quick and reliable unloading of coal trains in motion. 100-ton cars are emptied in less than 20 seconds.

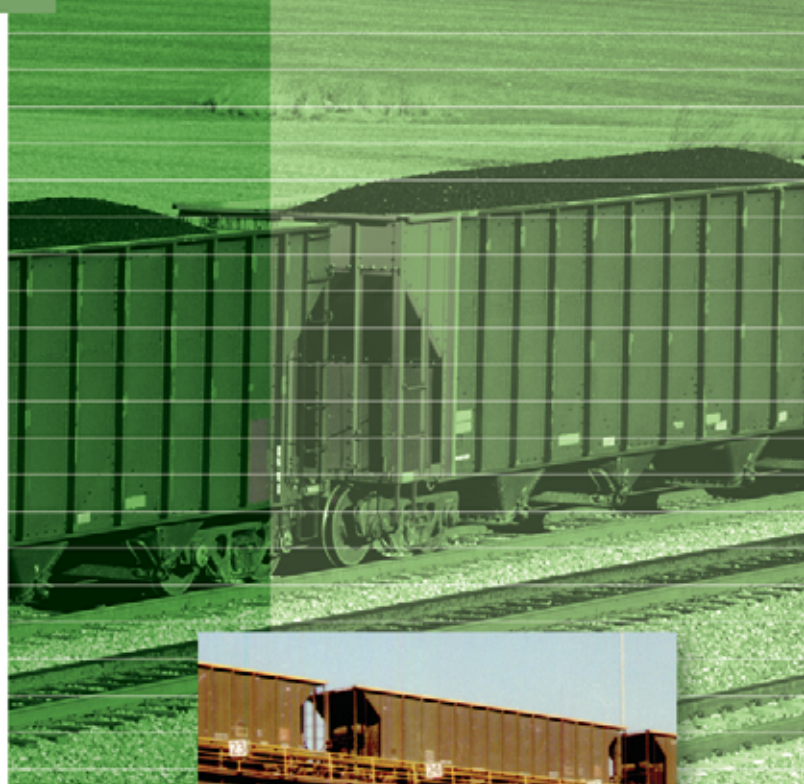

### Simple, Low Maintenance Design

AutoMEC's innovative air-operated, single-link door linkage system maximizes reliability, minimizes door adjustments and reduces maintenance costs over the life of the car.

The AutoMEC installs easily on existing and new center sill cars with two to five hoppers. The AutoMEC has been furnished for four- to twenty-door applications including extended models for western cars.

### Over 30 Years Proven Reliability

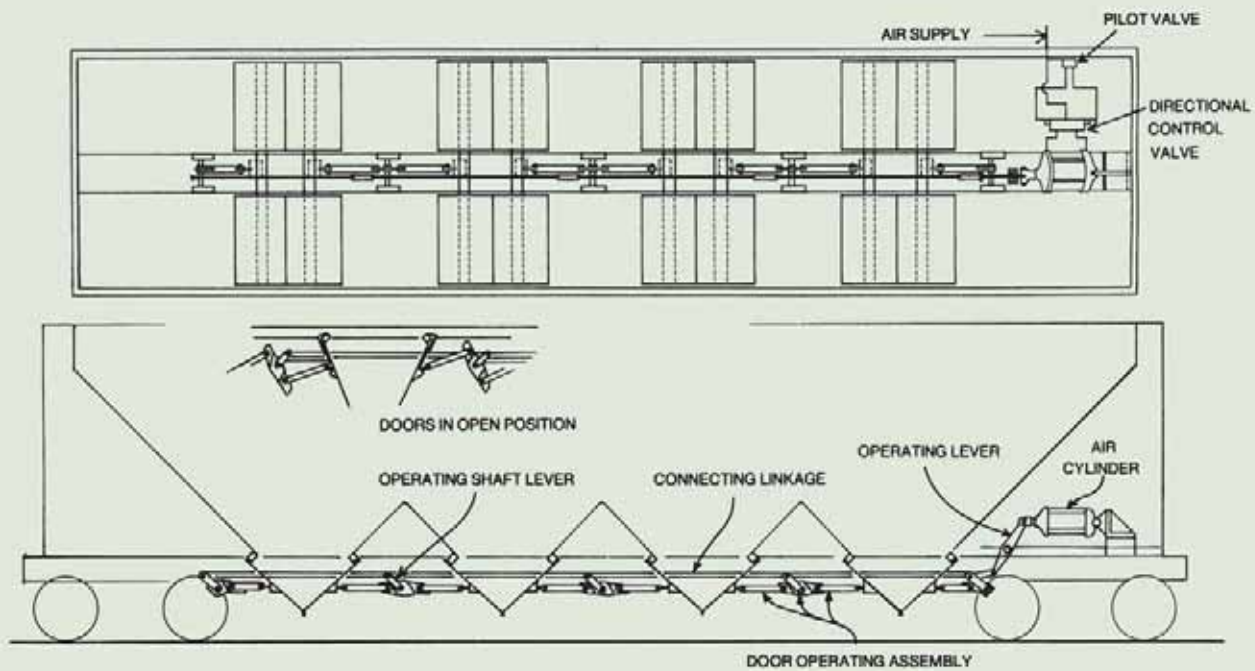

AutoMEC's superior design, performance, reliability and low maintenance advantages make it the perfect discharge mechanism for new or retrofit coal car applications. Over 12,000 carsets are currently in unit train service worldwide.
