

# VersaFlow®

## Rapid Discharge Covered Hopper

The fully automated Miner VersaFlow® Rapid Discharge system for hopper cars is designed to keep up with the industry's demand for rapid discharge of bulk commodities. 100-ton cars are emptied in less than 40 seconds, allowing you to discharge a full train containing thousands of tons of product quickly and on the move.

The VersaFlow installs easily on center sill cars and fits most standard or custom designs for covered hoppers. The VersaFlow is an engineered to order mechanism designed for simple modular application.

### FEATURES

- Proven reliability.
- Sealed door design.
- Modular design, for easy application.
- Unloads at speeds up to three miles per hour.
- Car-mounted push-button operation.
- Design option – simultaneous multiple hopper unloading.
- Design option – individual hopper unloading.
- Option – remote operation.
- Option – electric pick-up shoe operation.
