Long-lasting, Trouble-free performance.

PERFECTING RAILCAR PERFORMANCE

SERIES 2008

BRAKE BEAM

Gain These Advantages

Longer Service Life

- 1 Hardened and splined bushing (patented) extends the life of the beam.
- 2 Weld-free design with 5/16 inch thick compression member withstands vibration from shelled wheels.

Extended Brake Shoe and Wheel Life

- 3 Angle-corrected member reduces brake shoe consumption by up to 20%.
- 4 Zero interference brake key guide (patented) assures fast, easy and secure installation of brake shoes.
- 5 Key lock ensures retention of brake shoe key.

Trouble-free Service

- 6 Notched brake head reduces beam binding for more consistent braking.
- 7 Reversible strut quickly converts the hand of the beam.
