

AGGREGATE BALLAST  
Discharge Gates

# AGGREGATE®

The Miner AggreGate® can effectively ballast inside, outside or both sides of the rail simultaneously. Large guillotine door openings are designed to stop ballast flow with minimum effort, easy to operate toggle-type linkage systems and tapered doors provide easy ballast shutoff at switches, crossovers and bridges. Miner AggreGates are available in manual, air powered, or stand alone operating models.

- ◀ Simple to operate and install
- ◀ Precise, safe dumping of ballast when and where you want
- ◀ Reliable operation, reduced maintenance

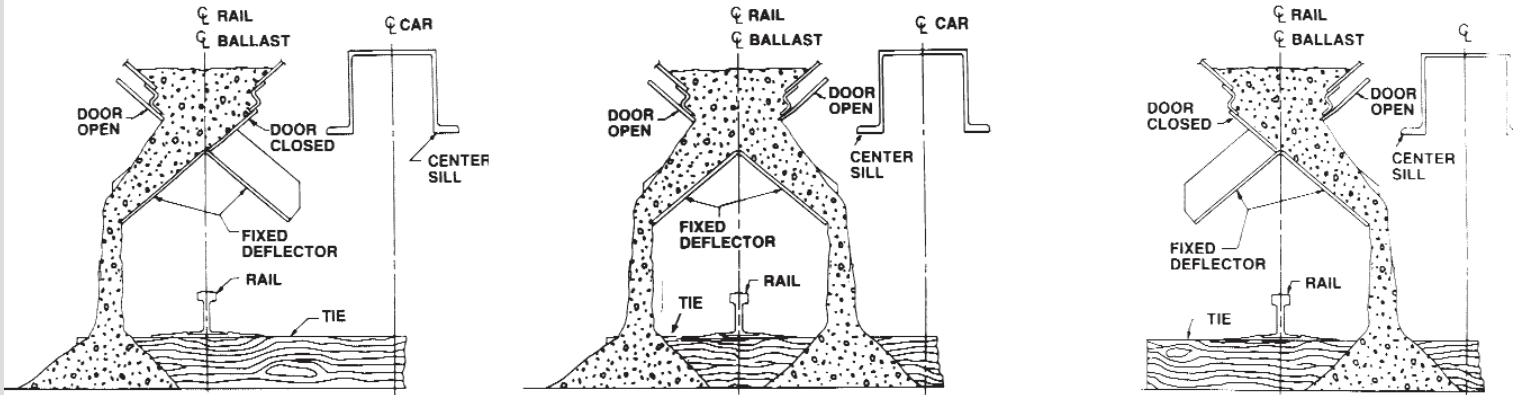

Simple. Reliable. Proven.

PERFECTING RAILCAR PERFORMANCE
