

TYPE "D"
Door Operating Mechanism

TYPE "D"

Miner Type "D" door operating mechanisms provide safe, fast, reliable discharge from open top hoppers, increasing safety, productivity and car utilization. The exclusive locking system of the Type "D" uses a primary over-center lock and a secondary cam lock to assure doors are sealed tight. When opened, doors automatically stay in the full open position for efficient, trouble-free unloading.

- ◀ Efficient, trouble-free unloading
- ◀ One person safe operation from either side of the car
- ◀ Secure, exclusive locking system

Simple. Reliable. Proven.
