

VERSAFLOW
Rapid Discharge Unloading System

VERSAFLOW™

The fully automated Miner VersaFlow™ Rapid Discharge System for covered hoppers is designed to keep up with the demand for unloading bulk commodities quickly and reliably into pits. This VersaFlow system enables a 100-ton car to be emptied in less than 40 seconds, allowing you to discharge a full train quickly and on the move up to 3 mph.

- ◀ Sealed door design
- ◀ Modular design for easy application
- ◀ Individual or simultaneous multiple hopper operation
- ◀ Push button, remote control, or pick-up shoe operation

Simple. Reliable. Proven.

PERFECTING RAILCAR PERFORMANCE
